

Pavan Kumar

Aspiring Cloud & DevOps Engineer

Education

B.Tech, Hyderabad Institute of Technology and Management (HITAM)
2023–2027 | Final Year – 1st Semester

Profile

Cloud and DevOps enthusiast with hands-on experience in AWS, Linux, Docker, Jenkins, Git, and CI/CD pipelines. Passionate about automating deployments, managing cloud infrastructure, and building scalable solutions.

Technical Skills

- AWS (EC2, IAM, S3, Auto Scaling Basics)
- Docker
- Jenkins
- Git & GitHub
- Linux Administration
- CI/CD Pipelines
- Python Basics
- Shell Scripting Basics
- Networking Fundamentals

Projects

Dockerized Web Application Deployment on AWS EC2

Built and deployed a portfolio website using Docker on AWS EC2 with container networking and public access.

CI/CD Pipeline using Jenkins and GitHub

Automated build and deployment workflows using Jenkins integrated with GitHub repositories.

AWS Auto Scaling Infrastructure

Designed scalable infrastructure concepts using Auto Scaling and high-availability principles.

Career Objective

To start a career as a Cloud & DevOps Engineer and contribute to reliable, scalable, and automated cloud environments while continuously learning modern DevOps practices.
